

Somaiya Noori

Frontend Developer | React & Next.js Specialist

 somayenoori786@icloud.com  +93 795844235  Herat, Afghanistan  linkedin.com/in/somaiya-noori
 github.com/Somaiyanoori  portfolio-somaiya.vercel.app

Frontend Developer specializing in building high-performance, accessible, and type-safe web applications using React 19, Next.js (App Router), and TypeScript. Brings a unique advantage with practical backend knowledge (Node.js, PostgreSQL) and a strong QA testing mindset. Experienced in building RTL/LTR multilingual interfaces, managing complex state, integrating secure REST APIs, and ensuring application reliability through automated UI and end-to-end testing.

Professional Experience

QA Tester | Code to Inspire (CTI)

11/2025 – 02/2026

- Executed manual, API, and automated UI tests for an online education platform
- Documented frontend bugs, visual defects, and cross-browser issues
- Reviewed UI components, collaborated on fixes, and verified requirements

Skills

— **Frontend Mastery:** React 19, Next.js (App Router), TypeScript, JavaScript, Tailwind CSS, Framer Motion • **State & Architecture:** TanStack Query, Zustand, Redux Toolkit, Context API, React Hook Form, Zod • **Backend & APIs (Integration):** Node.js, Express.js, REST APIs, PostgreSQL, Prisma, Supabase, Firebase • **Testing & QA:** Vitest, Playwright (E2E), Jest, React Testing Library, API Testing, Manual QA • **Tools & Infrastructure:** Git, GitHub, Docker, Postman, Swagger/OpenAPI, Vercel, i18next (RTL/LTR)

Languages

English: Certified A

Persian (Dari)

Certificates

Certified A+ — Frontend Development
Certified A+ — React Development
Certified A+ — Next.js Development
Certified A+ — Backend Development
English Language Certification — Grade A

Projects

E-Government Citizen Services Portal | Multi-Role Dashboard

• Engineered intuitive, real-time frontend dashboards for Citizens, Officers, and Admins to track municipal service workflows. • Integrated WebSocket (Socket.io) for live UI notifications and protected client-side routes using JWT authentication. • Collaborated on the backend API architecture to ensure seamless client-server communication. • Tech: React 19, TypeScript, Tailwind CSS, Socket.io, Node.js, Express, Prisma, PostgreSQL

KaarYab Afghanistan | Opportunity Platform & CV Builder

• Developed a responsive, accessible frontend featuring an interactive in-app CV builder with real-time PDF generation and complex multi-criteria filtering. • Implemented full RTL/LTR localization (Dari & English) using i18next and Tailwind CSS. • Built 172 automated tests (Unit, Component, Playwright E2E) achieving a 100% pass rate. • Integrated UI components securely with a Supabase backend and Clerk authentication. • Tech: Next.js, TypeScript, Tailwind CSS, Supabase, Clerk, Vitest, Playwright

Taply — Backend Developer

• Developed backend APIs for design uploads and visual feedback using Firebase Auth, Firestore, and Cloudinary. • Implemented request validation, rate limiting, and automated API testing. • Tech: Next.js API Routes, TypeScript, Firebase, Cloudinary, Zod, Jest.

Goal Tracker

• Developed a productivity application for creating and tracking goals with forms, filters, and responsive UI. • Tech: React, TypeScript, Node.js.

Product Store & State Architecture Demo

• Built an architecture demo comparing Redux Toolkit, TanStack Query, and Context API. • Demonstrated different approaches to state management, server-state handling, and application architecture. • Tech: React, TypeScript, Redux Toolkit, TanStack Query, Context API, Tailwind CSS.
